

Dear 2008 NSSBC Attendees:

PDM Bridge, a leader in the bridge fabrication industry has offered to give a tour of their Palatka, Florida bridge fabrication facility. This is a great opportunity to see how various elements of bridges are fabricated to be used in real world bridges.

The tour is free and PDM has been kind enough to pay for your transportation to their facility. On Thursday, May 22nd, 2008 at 1:30PM, several buses will pick you up from the Cabot Lodge. The tour is about 2 hours long. If you would like to learn more, please visit their website, www.pdmbridge.com.

In order to take part in the tour, you will be required to provide your own hardhat, safety glasses, and closed toe shoes.

If you would like to attend this tour, please check the box on the official registration form. I hope to see as you all there!

Sincerely,

James Falls
2008 NSSBC Director
